2-Panel with 1-Lite

2-Panel with 9-Lite

2-Panel with Arch Lite

6-Panel

New High-Definition
Embossment

AJ's broad range of panel options and features designed specifically for the garden shed industry.

AN INDUSTRY FIRST:

- 27" wide 2-panel door with a 1-lite or 9-lite
- Unique symmetrical 2-panel and 4-panel pattern design
- Right or Left handing feature in every door

Durability

- Doors are slam tested with over 100,000 high-force impact with no deformation or noticeable effect to the door.

Warranty

AJ's Garden Shed doors are designed and manufactured with quality materials and workmanship. The 60-month warranty applies to defective materials or workmanship. The warranty commences from the date of manufacture. At AJ's discretion, replacement or repair of product will be provided. Expenses associated with transportation and installation costs are at the owner's expense.

Quality Crafted Entry Doors And Windows

GARDEN SHED DOORS

Exclusive to the Garden Shed Industry—a field-replaceable insulated door lite with no visible fasteners. Lites are available with or without internal grids of painted aluminum that will not fade or yellow and allow for easy cleaning. All lites feature tempered glass for safety.

Features & Benefits

- Standard duty steel astragal is easy to install and is replaceable if damaged.
- Deluxe astragal provides strength & functionality in double door installations, the AJ deluxe astragal is fitted with weather-stripping providing protection against the elements.
- 20-gauge steel vertical latch strike plate for use in double door applications using vertical latches. The strike plate is designed to protect shed flooring and header at the latch point from breaking out.
- 1.25" and 1.75" thick, insulated, polyurethane foam filled panel provides increased weather protection as well as **labor & material savings** at the time of installation. Only a single .75" furring/trim board is required to produce a flush installation of 1.25" door in vinyl-sided structures.
- 100% steel shell eliminates the potential of swelling and rot associated with doors built with exposed wood or vinyl. AJ doors are injected with a proprietary blend, closed-cell foam that completely surrounds the wood reinforcement blocks for **exceptional strength, water & dent resistance**.
- Factory applied paint—**Roll-coated & baked over a galvanized surface** for exceptional resistance to rust, fading, and scratches. Doors can be custom painted by Shed Mfg. or customer.

Model & Size Specifications

- Doors are available in 72" and 78" height and 27", 30.5" and 35.75" width.
- Glass sizes are 20" /21" x 25" for 72" doors and 21" x 28" for 78" doors

Color Selection

- A variety of popular pre-painted colors are available based on volume, allowing for matching to vinyl siding of the shed and home. The AJ design provides benefits of factory coating, guaranteed color match at significant cost savings over "wet-coating" of door slabs.
